

Evie

Your go-to workstation – powered, upgradeable & future-ready

Features

A height-adjustable cart with a range of user-friendly features, Evie offers electric height adjustment and a unique, ergonomic design for accessing patient information at the point of care.

- ✓ Electric height adjustment to change the cart's height at the touch of a button.
- ✓ Retractable keyboard conveniently tucks out of the way during medication prep and dispensing.
- ✓ Can be configured to allow for the addition of a range of accessories.
- ✓ Work surface is durable and resistant to hospital cleaning agents.

Benefits

- Small footprint makes the cart easy to position in busy bays.
- Ergonomic workstation design brings the screen and keyboard closer to the user for a more comfortable working experience, with independent tilt adjustment for your monitors.
- Conveniently placed grab handles at the side of the cart provide an unobscured view when moving the cart to a new area.
- The wider work surface design offers protection from damage for your screen while being moved to a new area.
- LED battery gauge at front of cart provides an at-a-glance view of battery power status from across the room.
- Easily accessible PC enclosure and cable management.
- Up to two optional side rails provide versatility for mounting a range of accessories, such as label printers, barcode scanners, and sharps bins.
- Designed for infection control and ease of cleaning.
- Comprehensive 5-year cart warranty.

Areas of use

Evie is ideal for providing access to electronic patient records or medication notes in areas such as:

- A&E / ED
- ICU
- Theatres
- Wards

 LiFePO4 battery

 Electric height adjustment

This cart supports laptops, micro PCs, and medical-grade all-in-one PCs. The configuration above shows a micro PC powering two monitors (up to 24") with independently adjustable monitor mounts to find the right amount of tilt for each user's ergonomic preference.

The dual screen setup lets users move quickly between apps, reducing time lost to switching, remembering details, or recovering after interruptions. These small delays add up, so minimising them improves workflow and frees up more time to care. It also enables multiple clinicians to review patient information at the same time.

For more info on our carts, please get in touch with our sales team, who will be happy to help. Our contact details are below.
