

Tablet Cart

Secure, accessible tablet positioning at the point of care

Features

We've designed this cart to enable trusts to utilise tablets for EPR, patient surveys, translation services, and virtual ward rounds. Its small and lightweight design makes this cart easy to wheel out on busy wards and other congested areas.

The tablet is protected within a secure enclosure that's easy to wipe clean and can be rotated and height-adjusted to suit any user. It is compatible with a range of iPads and other tablets.

- ✓ Secure tablet enclosure can be tilted, rotated, and adjusted.
- ✓ Can be configured to allow for accessories.
- ✓ Strong and durable design that's built to last.

Benefits

- Small footprint and lightweight design makes the cart easy to position in tight spaces.
- Optional height adjustment is available for the tablet enclosure.
- Rear two wheels are lockable to ensure the cart remains stationary when in use.
- Designed for infection control and ease of cleaning.
- An ergonomically-designed base allows the user to find their perfect standing or seated position.
- Comprehensive 5-year cart warranty.

Areas of use

The versatility of this cart means it can be equipped for use in a range of different applications, such as:

- Virtual visits
- Electronic patient records
- Virtual ward rounds
- Patient surveys
- Translation and interpreting services

Compatible with

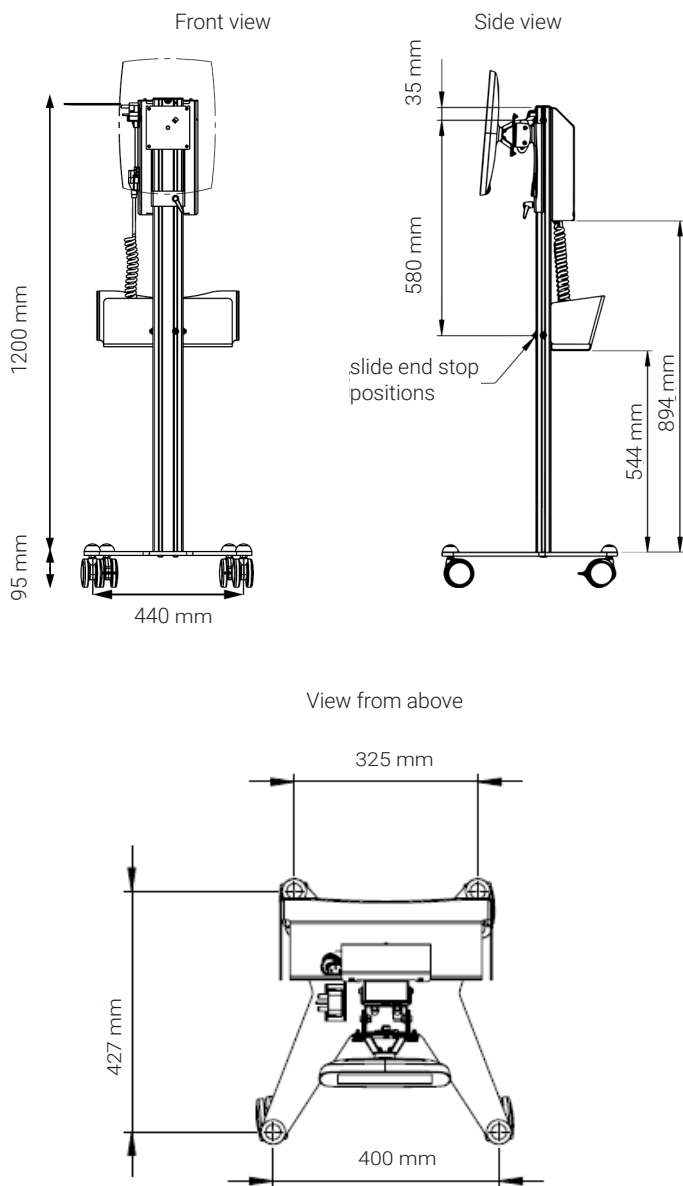

This cart can support any tablet that can be VESA-mounted to the profile. Example tablet models that can be fitted to these carts include:
