

Reporting Chair

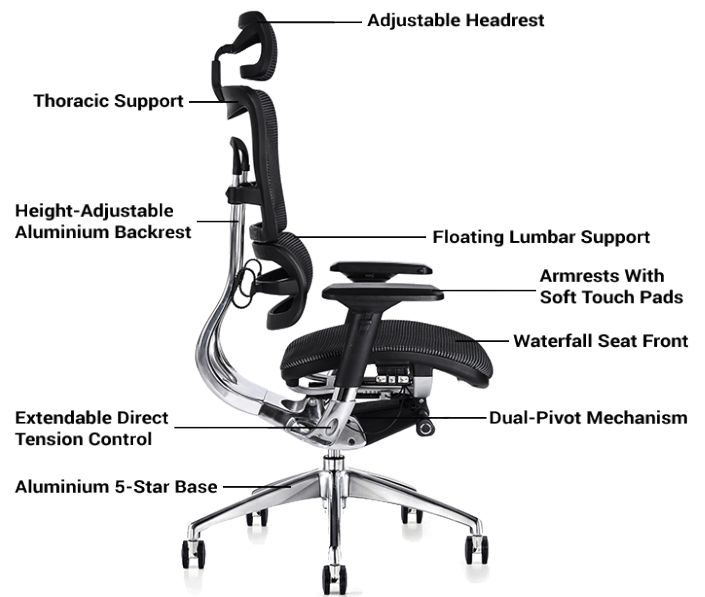

Comfort. Productivity. Health.

The Reporting Chair is perfectly suited for radiologists. It has patented floating lumbar and pelvic support system for complete comfort. Its intuitive controls mean that users of any shape or size get the right support and dynamic movement from the moment they sit in the Reporting Chair.

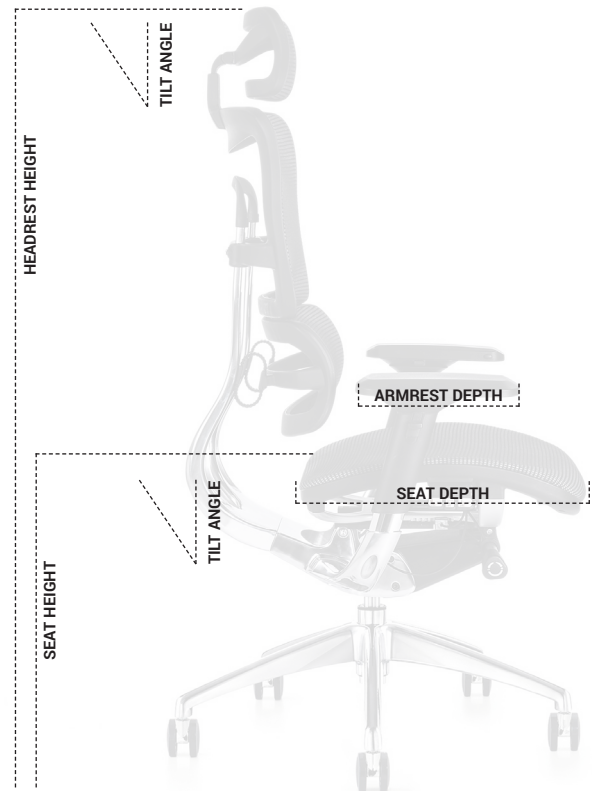

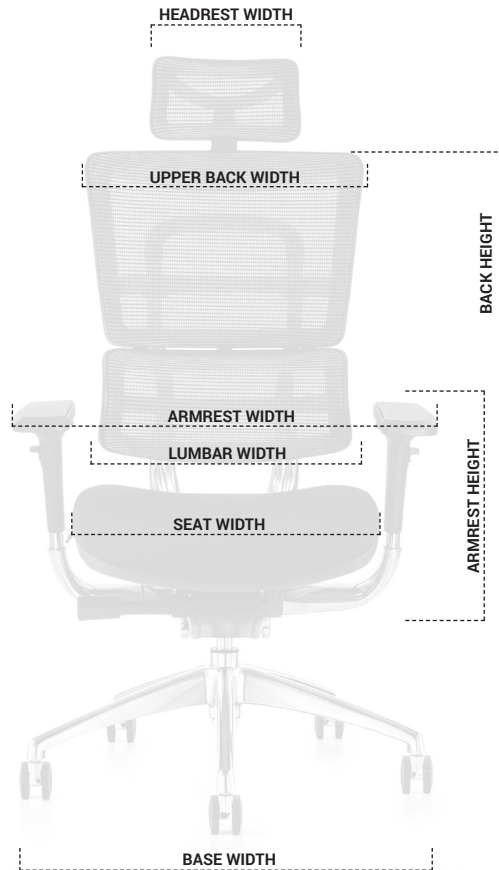

Features

- Optional headrests with height and angle adjustment.
- Upper back designed for great thoracic support.
- Aluminium height-adjustable backrest locking in three positions.
- Floating lumbar and pelvic supporting lower back.
- Intuitive, pictorial three lever control to activate seat height, seat slide and dynamic movement, allowing users infinite lock positions.
- Extendable direct tension control.
- Alloy mechanism finishes.
- Dual pivot mechanism.
- Rounded waterfall seat front.
- Multifunctional armrests with soft touch pads.
- Aluminium five-star base as standard.
